Explanatory Note:

This 2.70 class of test allows specifically approved senior analysts to develop, validate and use a new test method by the specified instrumental technique for a non-routine analysis in the classes of tests specified. The report over the analyst's personal signature may be endorsed with the IANZ Accreditation symbol. Should the method become routine, an IANZ technical assessment is required before the method can appear on the laboratory's scope of routine accredited tests.

2.70 Instrumental Techniques

(a1) **Gas chromatography (2.41, 2.58)**

(a2) **Gas chromatography (including Mass Selective Detection (MSD)) (2.41, 2.58)**

(b) **High performance liquid chromatography (including UPLC) (2.41)**

(d2) **Liquid chromatography – Tandem Mass Spectrometry (2.41, 2.58)**

All techniques pertain to classes of test shown in parenthesis detailed above.

Explanatory Note:

This 2.70 class of test allows specifically approved senior analysts to develop, validate and use a new test method by the specified instrumental technique for a non-routine analysis in the classes of tests specified. The report over the analyst's personal signature may be endorsed with the IANZ Accreditation symbol. Should the method become routine, an IANZ technical assessment is required before the method can appear on the laboratory's scope of routine accredited tests.
