

## Honey Testing Turnaround Times (TAT)

Test	Hill TAT (Normal/High) <sup>1</sup>	Hills TAT (Urgent) <sup>2</sup>
MPI Manuka5 Attributes	Next day	Same day
3in1 Analysis	Next day	Same day
Leptosperin	Next day	Same day
UMF™ Certificate (free of charge with 3in1)	Next day	Same day
NPA, if required (free of charge with 3in1)	Next day	Same day
Forecast Modelling (free of charge with 3in1)	Next day	Same day
Tutin	Next day	Same day
Tutin Composite	Next day	Same day
AFB	Next day	Same day
Glyphosate	3 days	2 days
C4 screen	4 days	2 days
C4 AOAC	5 days	3 days
Diastase	5 days	2 days
Moisture	5 days	2 days
Colour	5 days	2 days

### Honey Testing Notes:

1. Routine priority samples must arrive at the Hamilton laboratory by 12:00 PM

For any samples received after 12:00 PM, an additional day will be added on to the turnaround time.

2. Urgent testing must be pre-arranged with the laboratory prior to the sample(s) arriving on site.

Samples requiring urgent testing must arrive at our Hamilton laboratory before 9:00 AM to ensure urgent TAT can be achieved.

If the samples are received after 9:00 AM, they will be processed under routine priority.
